

Position:

Senior Fire Engineer located in the Sydney CBD office with responsibility for providing leadership and management of the Fire team working with a well-developed Client base with an existing portfolio of projects.

The successful candidate will be responsible for supporting the senior leadership team in the development of an east coast and possible international market and to significantly enhance their delivery and market penetration.

Duties include

- Undertaking detailed fire engineering design, **analysis, and** peer review, in accordance **with international guidelines and accepted industry practise.**
- Oversee the work of assigned engineers and contribute to their training and development.
- Negotiate with statutory and regulatory authorities.
- Prepare reports and submission including Fire Engineering Brief and Fire Engineering Reports.
- Be conversant with and have the ability to competently apply Fire Safety Engineering Documentation/Reference material.
- Liaise, conduct meetings and facilitate approval from the relevant authorities including the local councils & fire authority as applicable
- Maintain an overview and understanding of the team workload and associated resource requirements, and work with other team leaders to ensure resources are fully utilised.

Person:

First and foremost you are an experienced Fire Engineer with time served technical and analytical skills. It is expected you have the relevant qualifications & registrations and can show continuous learning in the Fire Engineering space.

You have well developed communication skills with experience in dealing with Clients particularly in influencing & negotiating positive business outcomes as well as a thorough understanding of their key drivers and expectations.

You have a proven track record in successfully delivering multiple projects of varying sizes with core skills in planning and organising tasks for yourself and others.

Rewards:

The company is offering a competitive package commensurate with experience with potential for an equity stake in the business as it grows.

You will work in a multidisciplinary business with an 'open book' culture that will allow you to leverage warm relationships to bring your skills and experience to a wider audience.
